## **DETAILED ACTION**

### ***Response to Amendment***

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn. In addition, the amendment sent on 6/1/04 will be entered.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2, 3, 47-52, 60-67, 68-75, 81, drawn to a method for modifying the acoustic effect of an array of two or more speakers, classified in class 381, subclass 305.
- II. Claims 11, 53-58, 76 and 82, drawn to a speaker system and method for modifying the acoustic effect of two or more speaker arrays, classified in class 381, subclass 300.
- III. Claims 77-80 and 83-85, drawn to a speaker system and method for modifying the acoustic effect of a plurality of arrays, classified in class 381, subclass 307.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation and effects because of the difference in the number of speakers and their positions in a listening space.

Art Unit: 2644

Because these inventions are distinct for the reasons given above and the search required for Groups I, II is not required for Group III, restriction for examination purposes as indicated is proper.

Claims 3, 11, 60, and 68 are generic to a plurality of disclosed patentably distinct species comprising modifying acoustic effect based on the physical relational characteristics of distance, azimuthal alignment, size, relative compliance, relative compliance of a speaker enclosure, relative frequency response of the speakers, and relative phase response of the speakers. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian T. Pendleton whose telephone number is (703) 305-9509. The examiner can normally be reached on M-F 7-4:30.
